

Amendments to the Specification:

Please replace paragraph 0028 with the following rewritten paragraph:

Fig. 3 is an exemplary functional block diagram of search engine 125 according to an implementation consistent with the principles of the invention. Search engine 125 may include document locator 310, history component 320, and ranking component 330. As shown in Fig. 3, ~~one or more of~~ document locator 310 ~~[[and]]~~ and/or history component 320 may connect to a document corpus 340. Document corpus 340 may include information associated with documents that were previously crawled, indexed, and stored, for example, in a database accessible by search engine 125. History data, as will be described in more detail below, may be associated with each of the documents in document corpus 340. The history data may be stored in document corpus 340 or elsewhere.
